All your drivers' time accounted for

If you're providing a courier service, not only do you have to be reliable, you have to be able to prove you are. Our WORKsmart fleet management solutions can help. It doesn't just let you see the exact location of your drivers – it also keeps a record of all the information you'll need to show you're complying with SLAs. From pick-up locations to delivery times, you'll be able to check the details of current and past jobs, and then generate an accurate, comprehensive report at the touch of a button.

Voice of the customer: Cheetah Couriers

"We are delighted with the integration of the TomTom units, and currently have more on order. We were concerned with the safety of our drivers working night time shifts and the TomTom solution has rectified this. It has been extremely useful to know where are drivers are at all times, whatever time of day and has made our business more efficient. The live traffic updates have made a substantial difference to journey times and drivers are pleased to avoid sitting in queues."

Lewis Pritchard, Director, Cheetah Couriers

For couriers, there are two things that can turn a simple delivery into a complete nightmare: not knowing where you're going, and being held up in traffic. A lot of your jobs will take you down familiar, well-trodden routes – especially if you're just going across town. But then there are those pick-ups and deliveries to places you've never been. To make matters worse, you can never predict traffic jams, especially if there's been an accident. And nothing makes finding your way harder than the anxiety that you're running late! TomTom WORKsmart™ solutions keep everything under control. Not only will we guide you straight to your destination, but we'll keep everyone in the loop on your progress too. You'll even get an idea of any delays up ahead. So you can sit back and relax, knowing we'll get you there the quickest possible way, giving your customer the reliable service they demand.

Trip data	
Total fuel consumption:	4.5l
Average fuel consumption:	10.1 l/100km (+1.8l)
CO2 emission:	10.46 kg
speed:	80 km/h

Deliver on time every time

If you're running a courier service, you know people don't like to be kept waiting. TomTom WORKsmart™ solutions can help you keep your customers in the loop with the progress of their delivery. You'll receive real-time information on your driver's position so you can update your customers as soon as there's a delay and give them a reliable ETA. You'll also be able to give them an accurate record of delivery times thanks to our vehicle tracking system – and prove you're complying with SLAs.

Make your service more competitive

With so much competition in the courier industry, keeping your costs down is key to holding on to customers. TomTom WORKsmart™ fleet management can help you save money on communication and fuel – so you can offer your customers the best possible rates. As soon as a call comes in for a delivery you'll be able to pass the information instantly to the closest driver, without any costly mobile phone calls. You'll also save on unnecessary mileage thanks to our state-of-the-art navigation system that uses real speed data and live traffic information to guide your vehicles from one pick-up to the next - safely, reliably and as quickly as possible.

Keep your couriers on the move

When your delivery drivers spend so much time on the road, hold-ups to their journeys can waste a lot of time and cause them undue stress. TomTom WORKsmart™ solutions can help your vans and bikes get across town faster, by avoiding traffic jams and unnecessary detours – giving your delivery drivers an easier, safer, worry-free journey. And you'll be able to track your vehicles to make sure they're being driven safely, but also so you know exactly how long drivers spend behind the wheel and that working hours are being put to good use.
